About

Lead Developer and FullStack Engineer focused on TypeScript and JavaScript.

Looking for full remote opportunities.

I build and ship CRM platforms, sales apps, and multi-tenant SaaS products from architecture to production.

My day-to-day stack includes Angular, Next.js, Node.js (AdonisJS, Express), with deployments on GCP and AWS using Docker, CI/CD, and Terraform.

I've lived and worked across Morocco, Belgium, the UK, and France.

Experience

Lead Developer - TypeScript & JavaScript

Sep 2022 - Present / Lyon, France

FREE ENERGIE

- Lead architecture and development of a CRM (Angular / Node.js) used by thousands of clients and collaborators.
- Define architecture, code standards, quality (tests, CI/CD), security, and observability.
- Design and deliver a Sales application (Next.js + AdonisJS) to accelerate business interactions and revenue.
- Establish coding conventions, lint/test standards, code reviews, and unified PR templates.
- Implement CI/CD pipelines, feature flags, canary releases, performance metrics, and alerting.
- Manage RBAC, secrets management, and endpoint hardening for security.
- Set up structured logs, traces, and product/tech dashboards for observability.
- Coach team through pair programming and impact-oriented agile rituals.
